Professional Summary

Backend Developer with 3+ years of experience designing, developing, and maintaining scalable server-side applications. Proficient in Laravel, RESTful APIs, and database management (MySQL). Adept at optimizing system performance and ensuring robust, secure infrastructure. Passionate about delivering efficient solutions and collaborating in agile environments.

Technical Skills

- Languages: PHP, JavaScript
 - Frameworks: Laravel, React
 - Databases: MySQL, Redis
 - Tools: Docker, Git
 - Other: RESTful APIs, Payment Integration (e.g., Chapa), Email Services (e.g., Mailtrap)
-

Professional Experience

Backend Heavy Fullstack Developer – Tikus P.L.C

June 2025 – Present

- Developing and maintaining scalable backend systems and fullstack features for a digital platform serving 1,000+ daily active users.
- Collaborating with cross-functional teams to deliver user-centric solutions in an agile environment.
- Ensuring high performance, security, and responsiveness across all application layers.

Backend Developer – KurazTech, Addis Ababa, Ethiopia

Feb 2024 – Aug 2024

- Designed and implemented monolithic architecture using Laravel.
- Developed RESTful APIs and integrated with MySQL databases, ensuring secure and efficient data handling.
- Optimized database queries to improve application performance.
- Led a team of 3 developers in agile sprints, delivering features on time and within budget.

- Integrated payment gates (Chapa) to enable secure and scalable transaction processing for e-commerce platforms.
 - Configured email services using Mailgun and SendGrid for automated notifications, transactional emails, and user communication.
-

Education

Bachelor of Science in Software Engineering

Haramaya University, Ethiopia

Sep 2019 – Jun 2025

- Relevant Coursework: Data Structures, Algorithms, Database Systems, Distributed Systems
 - GPA: 3.86
-

Key Projects

MediConnect Integrated Healthcare Solution

GitHub: github.com/Yonas721/mediconnect_integrated_healthcare_solution

Jan 2025 – May 2025

- Developed a secure healthcare management system for MediConnect, enabling seamless financial transactions within an integrated healthcare platform using Laravel and MySQL.
- Implemented features like patient billing, payment processing, and transaction history tracking, supporting up to 1,000 transactions daily with real-time updates.
- Optimized for low latency and scalability.

Finance Management System

GitHub: github.com/Yonas721/Finance_Management_Project

Feb 2024 – Jun 2024

- Developed a finance management application for small to large businesses using Laravel and MySQL.
- Implemented features like expense tracking, budget planning, and financial reporting, streamlining business financial operations.
- Ensured robust performance and secure data management through a web-based interface.
